SOUTH PACIFIC MONSTER TRUCK WORLD FINALS II

It's like witnessing a battle from a movie scene in the blockbuster hit Transformers.

TEN giant five tonne machines all with different awesome characters more like personalities launching over buses, double stacks of brightly painted cars, caravans, a huge Rock shaped exactly like Ayers Rock, even a large model of the Sydney Opera House with its own water Feature.

This is South Pacific Monster Truck World Finals II.

Ten of the World's most elaborate \$300,000 high tech monster trucks skilfully piloted by ten of the World's most fearless drivers in Side By Side Racing at speeds of over 100 kilometres per hour then flying off buses forty feet into the air this is **MONSTER TRUCK World Finals Freestyle.**

On November 14 from 6pm Brisbane international Speedway will for the first time ever host this annual event, in all reality probably the most Spectacular Motorsporting Spectacle to grace Australia's Shores, that will see 5 tonne monsters with names like Scooby Doo, TAZ, Batman, Monster Patrol and Aussie Champion Outback Thunda along with a World First the debut of 3 completely brand new \$350,000 Trucks, Raptors Rampage, Samson USA and Bugs Bunny, all being released at the very same event.

The USA drivers will include former USHRA World Champion Michigan's Jim Koehler, 3 times M.O.D USA Champ Utah's Kreg Christensen, Illinois Champ Paul Shafer and Ohio Legend Dan Patrick.

Australia will have a unique representation of three drivers from the same family, father and current Australian Champion Clive Featherby in Outback Thunda and the two Featherby teenage dare devils 17 year old Billy Featherby driving Scooby Doo and 15 year old Jaye driving TAZ both Billy and Jaye still attend Nambour high school during the week and fly to events on weekends.

World Finals II will cost over half a million to stage and at least half the field of monster trucks are expected to be completely destroyed by the completion of this unbelievable contest. Witnessing South Pacific Monster Truck World Finals will leave you exhilarated, amazed, gasping for air.

Racing is Contest #1:

The trucks contest a side by side drag race series then hitting a sharp corner and over an individual set of cars each to determine the Winner, eliminating the slowest truck each time until it comes down to sudden death final between the top two contenders. Hitting the corners at over 100 kilometres an hour one victor emerges as the 2009 World Racing Champion.

Then after a brief interval each truck then lines up for the 11,000 crowds favourite part of the night Monster ***FREESTYLE.***

Freestyle is Contest #2:

Freestyle is the monster truck World's ultimate battle field each truck is given 2 minutes, the green light flash and the driver accelerates and it's War on Wheels.

IT's TRUCK against anything in its path, buses the lot. Rules are virtually to cause as much destruction as you can in two minutes, hit as many big objects as you can, get huge air off the massive 20 foot high jumps, perform cyclones faster than a kids spinning top, wheel stand with sheer power in a breathtaking skywheelie right across the arena. Roll over even attempt to backflip but do what ever to win. There are limits except try to last two minutes.

The Champion is the driver who performs the best over two complete minutes and creates the most carnage.

This is World Finals Monster Truck Freestyle.

Just to show, the enormity of this massive extravaganza.

WHAT SORT OF SHOW HAS:

- ❖ The World's largest 14 Tonne Motorcycle crashing cars,
- ❖ Backflipping Freestyle Motorcross
- ❖ Australia's largest ever \$75,000 Stadium Fireworks Skyshow
- ❖ Jetvans
- ❖ Skydivers
- ❖ Stunt Planes and Stunt Acts

AS JUST THE SUPPORT PROGRAMME...

The Brisbane International Speedway is located at 68 Colebard Street Archerfield and this Mega family Spectacular will take a crew of 80 plus people ten days to transform B.I.S into the World Monster Truck Finals Coliseum but come Saturday Nov 14 rest assured these Giant Wheeled Warriors will leave Brisbane spectators spellbound by
